

REMINGTON ACCESSORY CHASSIS SYSTEM (RACS) AVAILABLE TO ACCOMMODATE REMINGTON® LONG AND SHORT 700 ACTIONS

The patent-pending Remington® Accessory Chassis System (RACS) incorporates state-of-the-art operator-defined attributes such as a free-float tubular design and a fully featured front handguard section. Operator-selectable auxiliary rail section pieces in various lengths can be attached to any of the seven remaining facets of the octagonal handguard, which allows the operator to apply clip-on in-line night vision systems in addition to other ancillary systems such as lasers, bipods and other accessories. The folding RACS buttstock provides the operator with a wide variety of adjustments to allow setting the system to suit the shooter and the operating conditions.

Rapid operator adjustments of chassis system to customize the system to the user:

- Adjustable height cheekpiece with fore and aft positional adjustment
- Adjustable position recoil pad
- Adjustable length of pull stock

Folding stock

Remington® Accessory Chassis System, Long Action (RACS-LA)

20 MOA monolithic top rail ensures adequate elevation adjustment for ranges beyond 1500m while also permitting the installation of ancillary electro-optics

Cable routing guides capture wires associated with electro-optics

Recessed sling attachment points

Removable rail pieces and longer overall length free-float tube allows the user to minimize or maximize rails to configure the system to the mission

Cut-out to capture the bolt handle while folded

Accommodates any AR-type grip

Remington® Accessory Chassis System- Lightweight (RACS-LW)

- Skeletonized Buttstock w/ Full Adjustability
- Cerakote Gen II IR Signature Management in Pantone 30118
- Bolt-on Package Complete w/ Magazines and Modular Rail Sections.
